

BMT Aerospace provides gears and mechanical components for aerospace applications and is responsible for R & D, design, machining, heat treatment, surface treatment and lab tests. These high-tech processes are followed by audits specific to the aviation environment.

BMT Aerospace International division operates in 3 locations, USA, Romania and Belgium. The Belgian organization is located in Oostkamp, near Bruges and is since more than 20 years a leading global manufacturer of racks and pinions of the drive mechanism of the slats (attack-board wing) for various commercial aircraft programs (Boeing, Airbus, Embraer, Sukhoi, ...)

To further ensure the team of some 90 experts, we are looking for a:

Programme Manager

Job description:

The Programme Manager is responsible for the successful management of scope for the assigned programme(s). Responsible for the total customer satisfaction and for an adequate financial performance for the development, manufacturing and support phases.

- You are responsible for the centralized planning, implementing and executing specific company goals or policies throughout the life-cycle of your assigned programs.
- You monitor associated budgets, issue progress reports and ensure deadlines are timely met.
- You design and maintain project- and technical documentation.
- You communicate continuously with the customer to maintain a high level of programme status awareness, provide timely recognition and resolution of problems (risk management) and identify follow-on business opportunities.
- You support the CEO on proposal development, contract negotiation and contract compliance.
- You assure that scope is managed appropriately and contract changes are secured where applicable.
- You represent BMT Aerospace International NV and European Aerospace Company NV at various meetings and other events.

Profile:

- You have master degree with specialization in mechanical engineering.
- Experience in aerospace or complex mechanical businesses is necessary.
- You have a perfect knowledge of Dutch, profound knowledge of English and French.
- You have commercial flair.
- You understand the project management process.
- You have good communication and negotiation skills.
- You are able to analyze and interpret common technical, financial, contractual reports and documents.
- Flexible and analytical thinking are a must.
- You are a strong teamplayer and are able to work constructive when confronted with opposite interests.
- A strong observation capacity is an asset.

Our offer:

- We provide the possibility to develop continuously.
- You are a part of a high eminent and dynamic world leader of the gear technology within the aerospace market.
- Your position is divers and you are a part of a growing company with a strong vision.
- Your remuneration is competitive.
-
